

Capture the Flag 1

Flag 1 – Install Flutter SDK

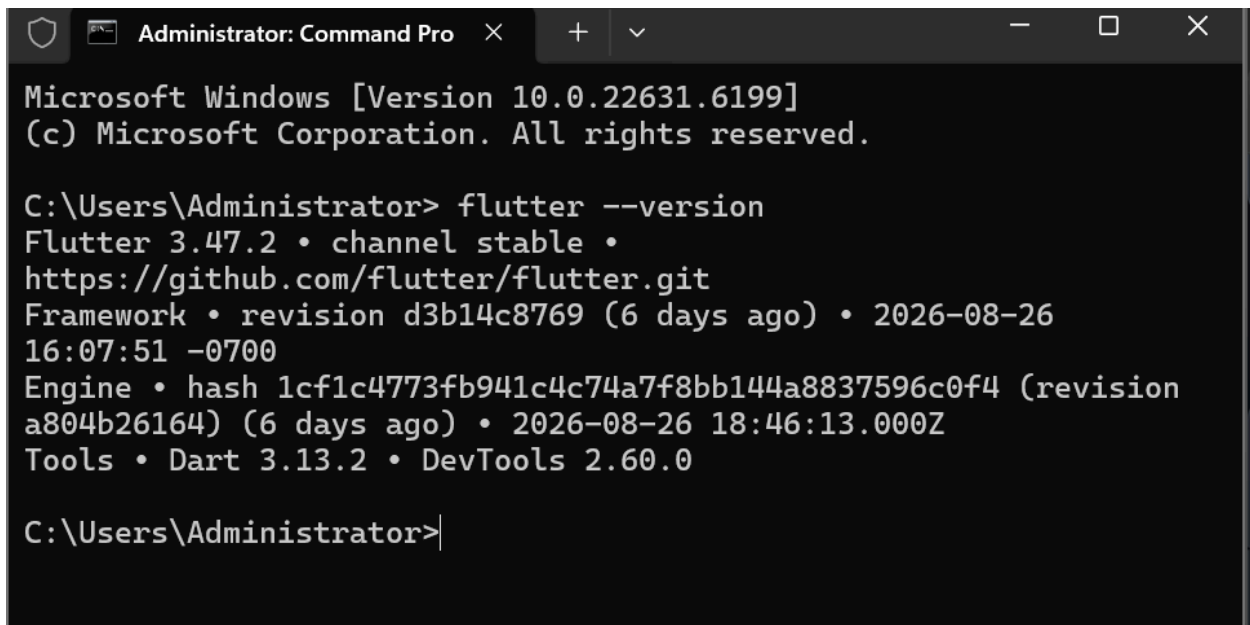

Objective: Install the Flutter SDK.

Verify:

`flutter --version`

Screenshot:

- The results of the command

```
Administrator: Command Pro x + v
Microsoft Windows [Version 10.0.22631.6199]
(c) Microsoft Corporation. All rights reserved.

C:\Users\Administrator> flutter --version
Flutter 3.47.2 • channel stable •
https://github.com/flutter/flutter.git
Framework • revision d3b14c8769 (6 days ago) • 2026-08-26
16:07:51 -0700
Engine • hash 1cf1c4773fb941c4c74a7f8bb144a8837596c0f4 (revision
a804b26164) (6 days ago) • 2026-08-26 18:46:13.000Z
Tools • Dart 3.13.2 • DevTools 2.60.0

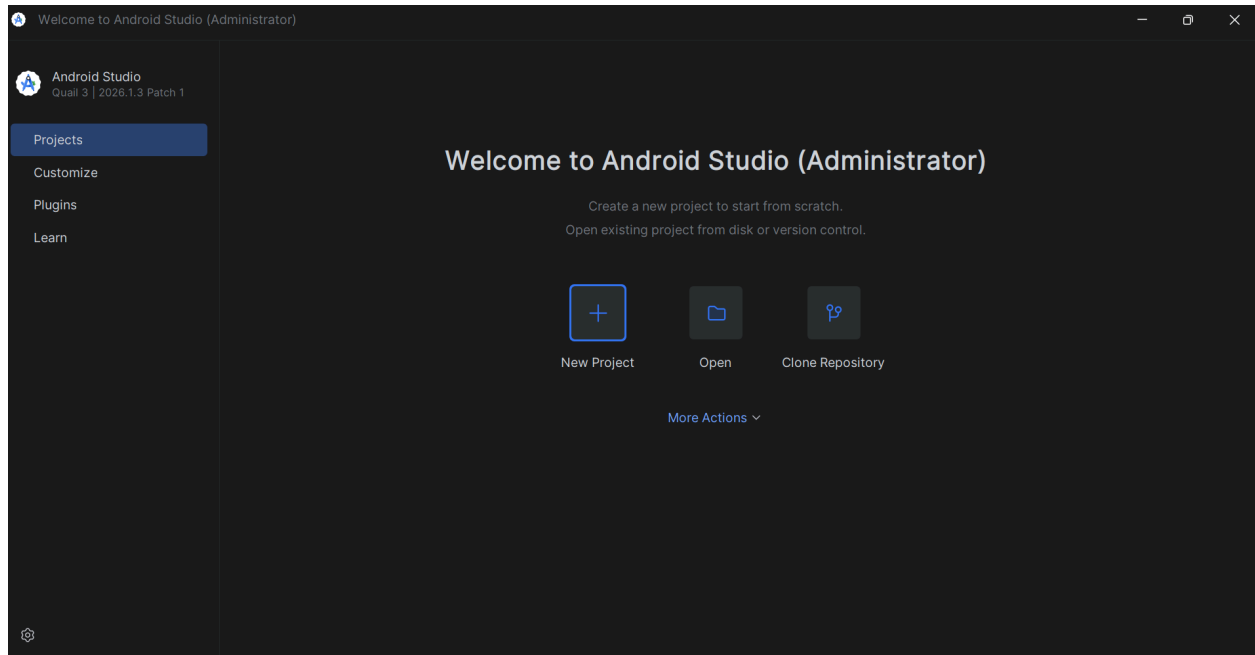

C:\Users\Administrator>
```

Flag 2 – Install Android Studio

Objective: Install Android Studio.

Screenshot:

- Android Studio installed
- SDK Manager opened (or Welcome screen)

🚩 Flag 3 – Install VS Code & Flutter Extension

Objective: Install VS Code and the Flutter (which also installs Dart) extension.

Screenshot:

- Flutter extension installed
- Dart extension installed (or shown as installed)
-

 codecov59%

Introduction

Dart Code extends [VS Code](#) with support for the [Dart](#) programming language, and provides tools for effectively editing, refactoring, running, and reloading [Flutter](#) mobile apps.

Installation

Dart Code can be [installed from the Visual Studio Code Marketplace](#) or by [searching within VS Code](#).

If you have any issues using Dart Code, please file issues on GitHub at <https://github.com/Dart-Code/Dart-Code/issues/new/choose>.

Features

- Edit and Debug Flutter mobile apps (launch using **F5** or the **Debug** menu)
- Edit and Debug Dart command line apps (launch using **F5** or the **Debug** menu)

Flag 4 – Run Flutter Doctor

Objective: Check whether everything is configured correctly.

Run:

```
flutter doctor
```

Screenshot:

- flutter doctor results

```
C:\Users\Administrator> flutter doctor
Doctor summary (to see all details, run flutter doctor -v):
[✓] Flutter (Channel stable, 3.47.2, on Microsoft Windows
    [Version 10.0.22631.6199], locale en-US)
[✓] Windows Version (11 Pro 64-bit, 23H2, 2009)
Checking Android licenses is taking an unexpectedly long time...

[✓] Android toolchain - develop for Android devices (Android SDK
    version 36.0.0)
[✓] Chrome - develop for the web
[✓] Visual Studio - develop Windows apps (Visual Studio
    Community 2026 18.9.2)
[✓] Connected device (3 available)
[✓] Network resources

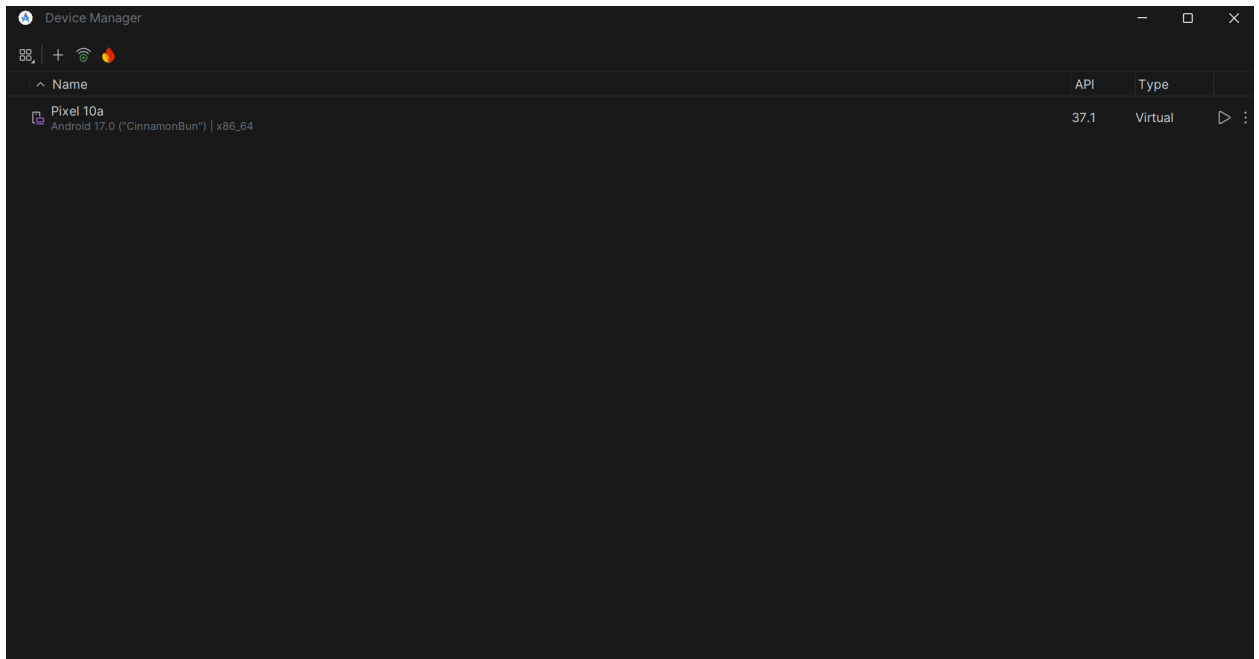

• No issues found!
```

Flag 5 – Build Your Virtual Device

Objective: Create your first Android Emulator (AVD).

Screenshot:

- Device Manager
- Your newly created virtual device
- Emulator successfully booted

🚩 Flag 6 – Forge Your Project

Objective: Create your first Flutter project.

Run:

```
flutter create my_first_flutter_app
```

Screenshot:

- Successful creation of project

```
C:\Users\Administrator> flutter create my_first_flutter_app
Creating project my_first_flutter_app...
Resolving dependencies in `my_first_flutter_app`... (8.3s)
Downloading packages...
Got dependencies in `my_first_flutter_app`.
Wrote 131 files.

All done!
You can find general documentation for Flutter at:
https://docs.flutter.dev/
Detailed API documentation is available at:
https://api.flutter.dev/
If you prefer video documentation, consider:
https://www.youtube.com/c/flutterdev

In order to run your application, type:

$ cd my_first_flutter_app
$ flutter run

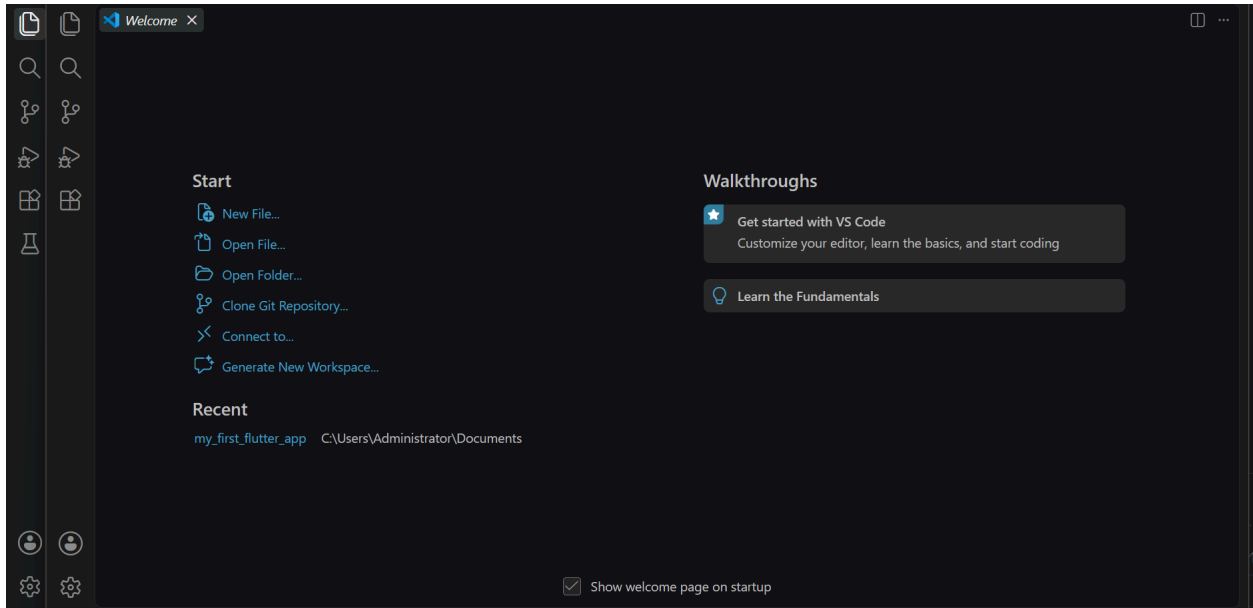

Your application code is in my_first_flutter_app\lib\main.dart.
```

Flag 7 – Unlock the Workspace

Objective: Open the project in VS Code.

Screenshot:

- Your project opened in VS Code

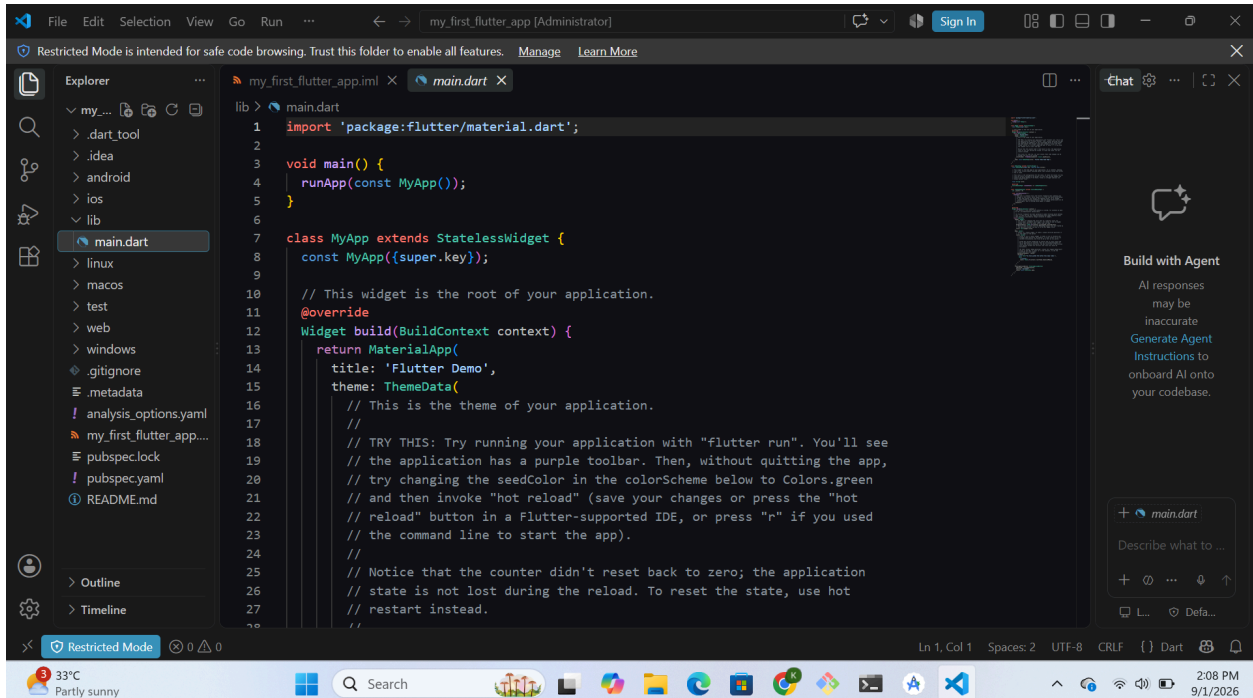

🚩 Flag 9 – Find the Entry Point

Figure out where the default Flutter page comes from.

Screenshot:

- The location of the file where the default page is from (the one showing on the emulator)

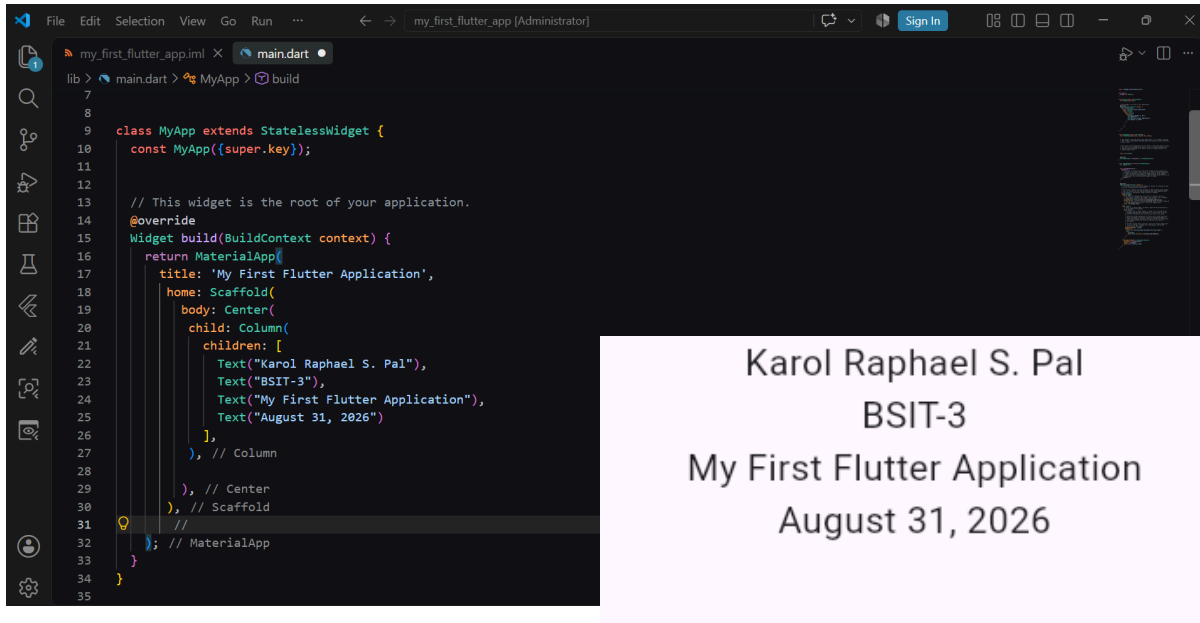

🚩 Flag 10 – Claim Your App

Replace the default screen with:

- Full Name
- Course & Section
- "My First Flutter Application"
- Today's Date

Screenshot:

- Your updated content of the code
- The updated UI

🚩 Flag 11 – Personalize It

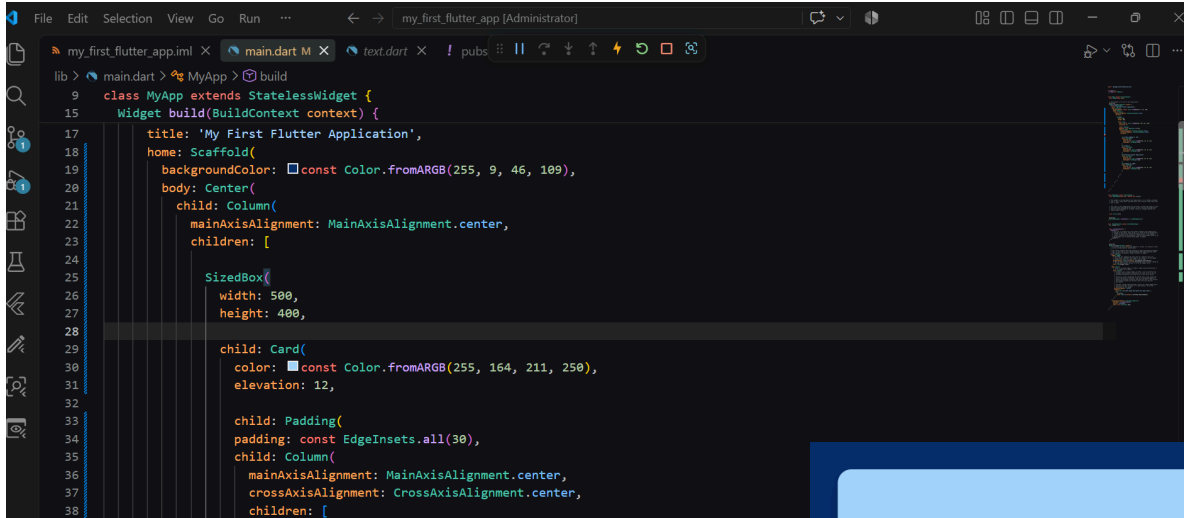

Research and implement at least **three** visual changes.

Examples:

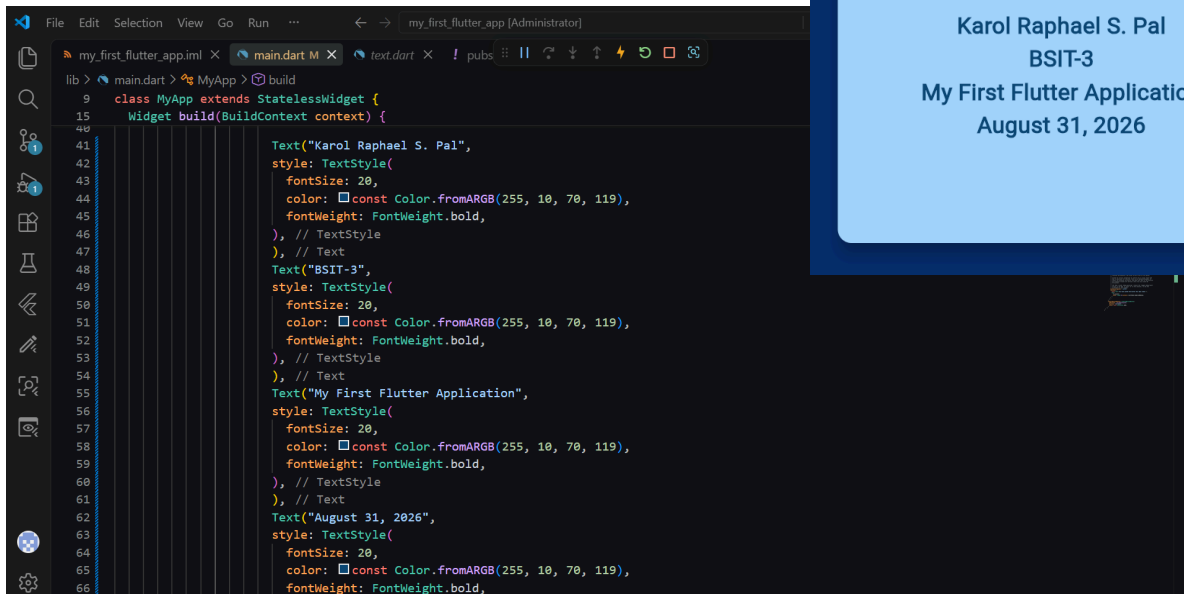

- Change the background colour.
- Change the text colour.
- Centre the content.
- Increase font size.
- Add a border or rounded card.
- Change the font.
- Add an emoji or icon.

Screenshot:

- The code changed for personalizing
- The updated UI

```
lib > main.dart > MyApp > build
9 class MyApp extends StatelessWidget {
15   Widget build(BuildContext context) {
17     title: 'My First Flutter Application',
18     home: Scaffold(
19       backgroundColor: const Color.fromARGB(255, 9, 46, 109),
20       body: Center(
21         child: Column(
22           mainAxisAlignment: MainAxisAlignment.center,
23           children: [
24
25             SizedBox(
26               width: 500,
27               height: 400,
28
29             child: Card(
30               color: const Color.fromARGB(255, 164, 211, 250),
31               elevation: 12,
32
33             child: Padding(
34               padding: const EdgeInsets.all(30),
35               child: Column(
36                 mainAxisAlignment: MainAxisAlignment.center,
37                 crossAxisAlignment: CrossAxisAlignment.center,
38                 children: [
```

```
lib > main.dart > MyApp > build
9 class MyApp extends StatelessWidget {
15   Widget build(BuildContext context) {
40
41     Text("Karol Raphael S. Pal",
42       style: TextStyle(
43         fontSize: 20,
44         color: const Color.fromARGB(255, 10, 70, 119),
45         fontWeight: FontWeight.bold,
46       ), // TextStyle
47     ), // Text
48     Text("BSIT-3",
49       style: TextStyle(
50         fontSize: 20,
51         color: const Color.fromARGB(255, 10, 70, 119),
52         fontWeight: FontWeight.bold,
53       ), // TextStyle
54     ), // Text
55     Text("My First Flutter Application",
56       style: TextStyle(
57         fontSize: 20,
58         color: const Color.fromARGB(255, 10, 70, 119),
59         fontWeight: FontWeight.bold,
60       ), // TextStyle
61     ), // Text
62     Text("August 31, 2026",
63       style: TextStyle(
64         fontSize: 20,
65         color: const Color.fromARGB(255, 10, 70, 119),
66         fontWeight: FontWeight.bold,
```

🚩 Flag 12 – Add an Image

Research how to:

- Create an **assets** folder
- Register assets
- Display an image

Screenshot:

- The steps it took to add an image
- The updated UI
